**EMERGENCY OVERVIEW**

**PHYSICAL APPEARANCE:** Colorless Liquid

**IMMEDIATE CONCERNS: Flammable Liquid.** May be ignited by open flames or sparks including static electricity. The vapors of this product may run along the ground to remote ignition sources. This material also has strong vapors which may be irritating to the respiratory tract and cause headache and blurred vision. It will be burning to the eyes and moderately irritating to the skin.

**POTENTIAL HEALTH EFFECTS**

**EYES:** Irritating to the eyes causing a burning sensation, redness, swelling and/or blurred vision.

**SKIN:** Moderate irritant.

**INGESTION:** Irritating to the gastrointestinal tract, causing abdominal pain and vomiting, sometimes bloody. Ingestion may cause CNS depression, low blood pressure and rapid heart beat. May be harmful if swallowed. Liquid can directly enter the lungs (aspiration) when swallowed or vomited. Serious lung damage and possible fatal chemical pneumonia can develop.

**INHALATION:** Breathing of high vapor concentrations may cause central nervous system (CNS) depression resulting in dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death. Vapors expected to be slightly irritating.

**3. COMPOSITION / INFORMATION ON INGREDIENTS**

Chemical Name	Wt.%	CAS
Isopropyl Alcohol	100	67-63-0

#### 4. FIRST AID MEASURES

**EYES:** Flush eyes with a large amount of water for at least 15 minutes, while holding eyelids open. Rest eyes for 30 minutes. If redness, burning, blurred vision or swelling persist, consult a physician.

**SKIN:** Flush with water, then wash with soap.

**INGESTION:** Do NOT induce vomiting. Have victim rinse mouth out with water, then drink sips of water to remove taste from mouth. DO NOT GIVE LIQUIDS TO A DROWSY, CONVULSING OR UNCONSCIOUS PERSON. If victim begins to spontaneously vomit, keep head below hips to prevent aspiration. Transport to nearest medical facility for additional treatment.

**INHALATION:** Move victim to fresh air. If the victim has difficult breathing or tightness of the chest, is dizzy, vomiting or unresponsive, give 100% oxygen with rescue breathing or CPR as required and transport to the nearest medical facility.

#### 5. FIRE FIGHTING MEASURES

**FLAMMABLE CLASS:** Category 2 Flammable Liquid

**EXTINGUISHING MEDIA:** Use 'alcohol foam,' dry chemical or carbon dioxide (CO<sub>2</sub>) to extinguish flames.

**FIRE FIGHTING PROCEDURES: Flammable.** Vapors are heavier than air and may travel across the ground and reach remote ignition sources. Clear fire area of all non-emergency personnel. Do not enter confined fire space without full bunker gear and SCBA. Containers exposed to intense heat from fires should be cooled with large quantities of water to prevent weakening of container structure which could result in container rupture.

**FIRE FIGHTING EQUIPMENT:** Full Bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure, NIOSH approved, self-contained breathing apparatus (SCBA).

#### 6. ACCIDENTAL RELEASE MEASURES

**SMALL SPILL:** Soak up residue with an absorbent such as clay, sand or other suitable material. Place in non-leaking container and seal tightly for proper disposal.

**LARGE SPILL:** Shut off source of leak if safe to do so. Create a dike to contain spill. Use water spray (fog) to reduce vapors or divert vapor cloud drift. If vapor cloud forms, use water fog to suppress or blanket spill area with foam. Remove with vacuum trucks or pump to storage/salvage vessels. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly. Flush area with water to remove trace residue. Contain run-off from residue flush and dispose of properly. Prevent entry into waterways, sewer, basements or confined areas.

#### ENVIRONMENTAL PRECAUTIONS

**WATER SPILL:** Do not allow spill to enter drains, sewers or waterways.

**GENERAL PROCEDURES: Protective Measures:** Evacuate area of unprotected personnel. Eliminate potential sources of ignition (no smoking, flares, sparks, or flames in immediate area). Stay upwind and keep out of low areas. Handling equipment must be bonded and grounded to prevent sparking. Wear appropriate personal protective equipment when responding to spills.

#### 7. HANDLING AND STORAGE

**GENERAL PROCEDURES:** Avoid contact with Skin, Eyes and Clothing

**HANDLING:** Surfaces that are sufficiently hot may ignite liquid material. Do not store or handle in aluminum equipment at temperatures above 120 F. Keep away from all ignition sources (flame, spark, etc.) until all vapors have dissipated. Use explosion-proof ventilation to prevent vapor accumulation while in use. Properly dispose of any contaminated rags or cleaning materials in order to prevent fires. Air-dry contaminated clothing in a well-ventilated area before laundering. Bond and ground handling equipment and transfer containers to prevent sparking.

**STORAGE:** Containers, even those that have been emptied, can contain explosive vapors. Do not cut, drill, grind, weld or perform similar operations on or near containers. Keep in cool, dry well-ventilated area. Keep container closed when not in use. Ground fixed equipment.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

### EXPOSURE GUIDELINES

OSHA HAZARDOUS COMPONENTS (29 CFR1910.1200)

**ENGINEERING CONTROLS:** Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits. Eye washes and showers for emergency use.

### PERSONAL PROTECTIVE EQUIPMENT

**EYES AND FACE:** Chemical splash goggles should be worn to prevent exposure of eyes to liquid, vapor or mist. An eye wash station should be maintained near work area.

**SKIN:** Use protective clothing which is chemical resistant to this material. Selection of protective clothing depends on potential exposure conditions and may include gloves, boots, suits and other items. The selection(s) should take into account such factors as job task, type of exposure and durability requirements.

**RESPIRATORY:** If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, an approved respirator must be worn. Respirator selection, use and maintenance should be in accordance with the requirements of the OSHA Respiratory Protection Standard, 29 CFR 1910. 134.

**ECOTOXICOLOGICAL INFORMATION:** Material is practically non-toxic to aquatic organisms on an acute basis ( LC 50 / EC 50 > 100 mg / L in the most sensitive species tested).

**BIOACCUMULATION/ACCUMULATION:** Product is readily biodegradable, shows low potential for bioaccumulation (BCF <100 or

log Pow <3). Potential for mobility in soil is very high (Koc 0-50).
